Dakshita Khurana

Email: dakshita@illinois.edu. **WebURL:** https://www.dakshitakhurana.com/

Research Interests: Cryptography, Quantum Information, Theoretical Computer Science.

Employment

2024 – ... ◇ **University of Illinois Urbana-Champaign;**
Associate Professor of Computer Science.

2024 – ... ◇ **NTT Research;**
(Senior) Scientist.

2019 – 24 ◇ **University of Illinois Urbana-Champaign;**
Assistant Professor of Computer Science.

2018 – 19 ◇ **Microsoft Research, New England;**
Postdoctoral Researcher.

Education

2018 ◇ **Ph.D. in Computer Science** at the University of California, Los Angeles.

2014 ◇ **M.S. in Computer Science** at the University of California, Los Angeles.

2012 ◇ **B. Tech. in Electrical Engineering with a Minor in Computer Science** at the Indian Institute of Technology (IIT) Delhi, India.

Honors

2025 ◇ *Founding Quantum Cryptography on Quantum Advantage, or, Towards Cryptography from #P Hardness* invited to the SIAM J. Computing Special Issue for STOC 2025.

2024 ◇ Google Research Scholar Award.

◇ Dean's Award for Excellence in Research, UIUC Grainger College of Engineering.

2023 ◇ NSF CAREER Award.

◇ Visa Faculty Research Award.

◇ On the List of Teachers Ranked as Excellent for Spring 2023 at UIUC.

2022 ◇ DARPA Forward Riser.

◇ Visa Faculty Research Award.

◇ IIT Delhi Graduate of Last Decade (GOLD) Alumni Award.

◇ On the List of Teachers Ranked as Excellent for Fall 2022 at UIUC.

2021 ◇ Visa Faculty Research Award.

◇ On the List of Teachers Ranked as Excellent for Spring 2021 at UIUC.

◇ *One-way Functions imply Secure Computation in a Quantum World* invited to Quantum Information Processing (QIP)'21 as a Long Plenary Talk.

Honors (continued)

2020
- ◇ On Forbes' List of 30 under 30 in Science.
- ◇ Google Research Fellow at the Simons Institute for the Theory of Computing, Berkeley.

2019
- ◇ On the List of Teachers Ranked as Excellent for Fall 2019 at UIUC.
- ◇ *Weak Zero-knowledge Beyond the Black-box Barrier* invited to the SIAM J. Computing Special Issue for STOC 2019.

2018
- ◇ UCLA CS Outstanding Graduating PhD Student Award.
- ◇ Dissertation Year Fellowship, University of California Los Angeles.
- ◇ Symantec Outstanding Graduate Student Research Award.

2017
- ◇ *How to Achieve Non-malleability in One or Two Rounds* invited to the SIAM J. Computing Special Issue for FOCS 2017.
- ◇ CISCO Outstanding Graduate Student Research Award.
- ◇ Invited as Young Researcher to the Heidelberg Laureate Forum.
- ◇ Invited Participant at Rising Stars in EECS 2017 at Stanford.

2012
- ◇ Computer Science Department Fellowship, University of California Los Angeles.

All Publications

Authors are in alphabetical order. Student and postdoctoral co-authors (at the time of submission) are indicated with *.

1. *Cakan, A., Khurana, D., Morimae, T., *Shirakawa, Y., *Tomer, K. & Yamakawa, T. (2026). On the cryptographic futility of non-collapsing measurements. *In Advances in Cryptology, EUROCRYPT 2026*.

2. Chakraborty, S., *Hulett, J., *Tomer, K. & Khurana, D. (2026). Non-trivial zero-knowledge implies one-way functions. *In Advances in Cryptology, CRYPTO 2026*.

3. Khurana, D. & *Tomer, K. (2025). Founding quantum cryptography on quantum advantage, or, towards cryptography from #P hardness. *In Symposium on the Theory of Computing, STOC 2025 and Quantum Information Processing, QIP 2025.* **Invited to the SIAM Journal on Computing Special Issue for STOC 2025. Invited talk at Asiacrypt 2024. Invited tutorial at QIP 2025.**

4. *Bartusek, J. & Khurana, D. (2025). On the power of Oblivious State Preparation. *In Advances in Cryptology - CRYPTO 2025*.

5. Chakraborty, S., *Hulett, J. & Khurana, D. (2025). On weak NIZKs, one-way functions and amplification. *In Advances in Cryptology - CRYPTO 2025*.

6. *Jawale, R. & Khurana, D. (2024). Unclonable non-interactive zero-knowledge. *In Advances in Cryptology, Asiacrypt 2024*.

7. Khurana, D. & *Tomer, K. (2024). Commitments from quantum one-wayness. *In Symposium on the Theory of Computing, STOC 2024 and Quantum Information Processing, QIP 2024*.

8. *Bartusek, J., Goyal, V., Khurana, D., Malavolta, G. & *Roberts, B. (2024). Software with certified deletion. *In Advances in Cryptology, EUROCRYPT 2024 and Quantum Information Processing, QIP 2023.*

9. *Bartusek, J. & Khurana, D. (2023). Cryptography with certified deletion. *In Advances in Cryptology, CRYPTO 2023 and Quantum Information Processing, QIP 2023.* **Invited Tutorial at QCrypt 2023.**

10. *Bartusek, J., Khurana, D. & *Poremba, A. (2023). Publicly-verifiable deletion via target-collapsing functions. *In Advances in Cryptology, CRYPTO 2023.*

11. *Bartusek, J., Khurana, D. & Srinivasan, A. (2023). Secure computation with shared EPR pairs (or: How to teleport in zero-knowledge). *In Advances in Cryptology, CRYPTO 2023.*

12. Ishai, Y., Khurana, D., Sahai, A. & Srinivasan, A. (2023b). Round-optimal black-box mpc in the plain model. *In Advances in Cryptology, CRYPTO 2023.*

13. *Agarwal, A., *Bartusek, J., Khurana, D. & *Kumar, N. (2023). A new framework for quantum oblivious transfer. *In Advances in Cryptology - EUROCRYPT 2023.*

14. *Garg, R., Khurana, D., *Lu, G. & Waters, B. (2023). On non-uniform security for black-box non-interactive CCA commitments. *In Advances in Cryptology - EUROCRYPT 2023.*

15. Ishai, Y., Khurana, D., Sahai, A. & Srinivasan, A. (2023a). Black-box reusable NISC with random oracles. *In Advances in Cryptology - EUROCRYPT 2023.*

16. *Agarwal, A., Alamati, N., Khurana, D., Raghuraman, S. & Rindal, P. (2023). On black-box verifiable outsourcing. *In Theory of Cryptography Conference, TCC 2023.*

17. *Bartusek, J., Khurana, D., Malavolta, G., *Poremba, A. & Walter, M. (2023). Weakening assumptions for publicly-verifiable deletion. *In Theory of Cryptography Conference, TCC 2023.*

18. Khurana, D., Malavolta, G. & *Tomer, K. (2023). Weak zero-knowledge via the Goldreich-Levin theorem. *In Advances in Cryptology, Asiacrypt 2023.*

19. Canetti, R., *Chakraborty, S., Khurana, D., *Kumar, N., Poburinnaya, O. & Prabhakaran, M. (2022). COA-secure obfuscation and applications. *In Advances in Cryptology, EUROCRYPT 2022.*

20. *Hulett, J., *Jawale, R., Khurana, D. & Srinivasan, A. (2022). SNARGS for P from sub-exponential DDH and QR. *In Advances in Cryptography, EUROCRYPT 2022.*

21. Ishai, Y., Khurana, D., Sahai, A. & Srinivasan, A. (2022a). Round optimal black-box protocol compilers. *In Advances in Cryptology, EUROCRYPT 2022.*

22. Ishai, Y., Khurana, D., Sahai, A. & Srinivasan, A. (2022b). Round-optimal black-box secure computation from two-round malicious ot. *In Theory of Cryptography Conference, TCC 2022.*

23. Badrinarayanan, S., Ishai, Y., Khurana, D., Sahai, A. & Wichs, D. (2022). Refuting the dream XOR lemma via ideal obfuscation and resettable MPC. *In the Information Theory Conference, ITC 2022.*

24. *Jawale, R., Kalai, Y. T., Khurana, D. & *Zhang, R. (2021). SNARGs and PPAD hardness from sub-exponential LWE. *In Symposium on the Theory of Computing, STOC 2021.*

25. *Bartusek, J., *Coladangelo, A., Khurana, D. & *Ma, F. (2021b). One-way functions imply secure computation in a quantum world. *In Advances in Cryptology, CRYPTO 2021.* **Long Plenary at Quantum Information Processing, QIP 2021. Invited Talk at QCrypt 2021. Invited Talk at Information Theoretic Cryptography (ITC) 2022. Invited Tutorial at the UCLA Institute for Pure and Applied Mathematics (IPAM) Graduate Summer School on Post-quantum and Quantum Cryptography.**

26. *Bartusek, J., *Coladangelo, A., Khurana, D. & *Ma, F. (2021a). On the round complexity of two-party quantum computation. *In Advances in Cryptology CRYPTO 2021, Quantum Information Processing QIP 2021, and QCrypt 2021.*

27. *Chatterjee, R., Garg, S., Hajiabadi, M., Khurana, D., *Liang, X., Malavolta, G., Pandey, O. & *Shiehian, S. (2021). Compact ring signatures from Learning with Errors. *In Advances in Cryptology, CRYPTO 2021*.

28. Ishai, Y., Khurana, D., Sahai, A. & Srinivasan, A. (2021). On the round complexity of black-box secure MPC. *In Advances in Cryptology, CRYPTO 2021*.

29. Khurana, D. & Srinivasan, A. (2021). Improved computational extractors and their applications. *In Advances in Cryptology, CRYPTO 2021*.

30. *Agarwal, A., *Bartusek, J., Goyal, V., Khurana, D. & Malavolta, G. (2021b). Two-round maliciously secure computation with super-polynomial simulation. *In Theory of Cryptography Conference, TCC 2021*.

31. Khurana, D. (2021). Non-interactive distributional indistinguishability (NIDI) and non-malleable commitments. *In Advances in Cryptography, EUROCRYPT 2021*.

32. Khurana, D. & Waters, B. (2021). On the CCA upgradeability of public-key infrastructure. *In international conference on practice and theory of public-key cryptography PKC 2021.*

33. *Agarwal, A., *Bartusek, J., Goyal, V., Khurana, D. & Malavolta, G. (2021a). Post-quantum multi-party computation. *In Advances in Cryptography, EUROCRYPT 2021*.

Invited Talks

1. **Exploring Minimal Assumptions in Quantum Cryptography**
   Institute for Advanced Study CSDM Seminar, Dec 2025.
   Year of Quantum Across Canada Conference *(Plenary Talk)*, Perimeter Institute, Oct 2025.
   Eastern Great Lakes Theory of Computation Workshop *(Invited Talk)*, Oct 2025.

2. **Quantum Cryptography**
   Invited Tutorial at the Simons Institute Cryptography Bootcamp Workshop, May 2025.

3. **Quantum Cryptography and TCS**
   Invited Tutorial at Quantum Information Processing (QIP), Feb 2025.

4. **The Complexity-Theoretic Foundations of Quantum Cryptography**
   Oberwolfach 2025 (*Plenary talk*), Jan 2025.
   Asiacrypt 2024 (*Invited talk*), Dec 2024.

5. **Founding Quantum Cryptography on Quantum Advantage, or, Towards Cryptography from #P-Hardness**
   Quantum technologies for cryptography workshop at Institut Henri Poincaré, Paris, Dec 2024.

Stanford Quantum Information Seminar, Nov 2024.
Kyoto Quantum Cryptography Workshop, Nov 2024.
UT Austin Quantum Information Seminar, Oct 2024.

6. **Cryptographic Hardness in a Quantum World.**
Theory of Quantum Computation, Communication & Cryptography (*Plenary talk*), Sep 2024.
Beyond IID in Information Theory conference (*Invited talk*), Aug 2024.

7. **How to Certifiably Delete a Secret.**
Simons (Berkeley) Workshop on Cryptography from Minimal Assumptions, May 2023.
CMU Cylab Cryptography Seminar, Nov 2022.

8. **Weakening Assumptions in Quantum Cryptography.**
Tutorial at the UCLA IPAM Graduate Summer School on Quantum Cryptography, July 2022.
Spotlight Talk at the Information-Theoretic Cryptography Conference *(Invited)*, July 2022.
QCrypt Conference *(Invited Talk)*, August 2021.

9. **SNARGs for P from Sub-exponential DDH and QR.**
Boston Crypto Day, July 2022.

10. **On Removing Interaction in Non-Malleable Commitments.**
MIT Cryptography and Information Security (CIS) Seminar, Apr 2021.

11. **Secure Federated Learning for Clinical Diagnostics with Applications to COVID-19.**
C3.AI DTI Symposium (virtual), Jan 2021.
Jump Arches Seminar (virtual), Nov 2020.

12. **SNARGs and PPAD Hardness from Sub-exponential LWE.**
Tata Institute of Fundamental Research Colloquium, Dec 2020.

13. **Post-quantum Multi-party Computation.**
Theory and Practice of Multiparty Computation Workshop (TPMPC *Invited talk*), May 2020.

14. **Weak Zero-Knowledge Beyond the Black-Box Barrier.**
Trends in TCS Workshop, TTI Chicago, Jan 2020.
Carnegie Mellon University Theory seminar, Pittsburgh, Jun 2019.
Indian Institute of Technology, Mumbai, Dec 2018.

15. **Two-Message Statistically Private Arguments.**
Simons (Berkeley) Workshop on Probabilistically Checkable and Interactive Proofs, Sep 2019.

16. **Quantum Advantage and Classical Cryptography.**
Charles River Crypto Day at Northeastern University, May 2019.

17. **On Cryptographic Proof Systems.**
Caltech CMS Theory Seminar, Dec 2017.

18. **New Techniques for Knowledge Extraction.**
South California Theory Day, Los Angeles, Nov 2017.

19. **The Virtues of Two-Message OT.**
Boston University Crypto Seminar, Sep 2017.

20. **Distinguisher-Dependent Simulation.**
DIMACS Workshop on Outsourcing Computation Securely, Rutgers University, Jul 2017.

21. **How to Achieve Non-Malleability in One or Two Rounds.**
MIT Cryptography and Information Security (CIS) Seminar, Jun 2017.
UCSD Theory Seminar, San Diego, Nov 2016.

22. **Birthday Simulation from Exponential Hardness, and its Applications.**
New York Crypto Day at Cornell Tech, New York, May 2017.

23. **How to Generate and Use Universal Samplers.**
Stanford DIMACS Workshop on Cryptography and Software Obfuscation, Nov 2016.
South California Theory Day, Los Angeles, Nov 2015.

24. **Breaking the Three Round Barrier for Non-Malleable Commitments.**
Simons Institute (Berkeley) Cryptography Reunion Workshop, Aug 2016.
DIMACS Workshop on Cryptography and its Interactions, Rutgers University, Jul 2016.
MIT Cryptography and Information Security (CIS) Seminar, Jun 2016.
New York University Cryptography Reading Group, May 2016.
Cornell Tech Cryptography Seminar, May 2016.

25. **Multi-party Key Exchange for Unbounded Parties from Obfuscation.**
Stanford Security Seminar, Feb 2016.
Simons Institute (Berkeley) Workshop on Securing Computation, Aug 2015.

Current and Prior Research Support

2024 ◇ **Google Research Scholar Award**
"Cryptography for the Quantum Age".
PI: Dakshita Khurana. *USD 60,000.*

2023-28 ◇ **Air Force Office of Scientific Research:**
"Computational Hardness in Quantum Cryptography".
PI: Dakshita Khurana. *USD 714,940.*

2023-28 ◇ **NSF CAREER:**
"Cryptographic Proofs, Outside the Black-Box"
PI: Dakshita Khurana. *USD 538,923.*

2023-26 ◇ **NSF SaTC Small:**
"New Cryptographic Capabilities for a Quantum World"
PI: Dakshita Khurana. *USD 571,719.*

2021-25 ◇ **Visa Research Faculty Award**
PI: Dakshita Khurana. *USD 225,000.*

Current and Prior Research Support (continued)

2021-24 ◇ **NSF MPS/Physics**
"Pushing the Boundaries of Classical and Quantum Information Processing Toward Enhanced Security and Energy-Efficient Reliability".
PI: Eric Chitambar, co-PIs: Lav Varshney, Dakshita Khurana. *USD 599,912.*

2020-24 ◇ **DARPA**
"SIEVE: New Directions in Post-Quantum Zero-Knowledge".
PI: Amit Sahai, co-PI: Dakshita Khurana. *UIUC subaward: USD 423,422.*

2019-21 ◇ **C3AI DTI, Jump Arches**,
"Secure Federated Learning for Clinical Informatics".
PI: Oluwasanmi Koyejo, co-PIs: William Bond, Dakshita Khurana. *USD 100,000.*

2019-20 ◇ **Jump ARCHES**,
"Secure Federated Learning for Clinical Diagnostics".
PI: Oluwasanmi Koyejo, co-PIs: William Bond, Dakshita Khurana. *USD 60,000.*

Advisees

Postdocs
- ◇ **Mehrdad Tahmasbi**, 2023-25.
- ◇ **Naresh Goud Boddu**, 2024.
- ◇ **Justin Raizes**, 2025.

PhD
- ◇ **Amit Agarwal**, 2019-2025. (First job: Senior Research Scientist at Category Labs)
- ◇ **Ruta Jawale**, 2019-Present. (Graduation expected: 2025)
- ◇ **James Hulett**, 2020-Present. (Graduation expected: 2026)
- ◇ **Kabir Tomer**, 2022-Present. (Graduation expected: 2027)

MS
- ◇ **Nishant Kumar**, MS Completed: 2022.
  Thesis: New Frameworks for Quantum Oblivious Transfer.
- ◇ **Ruta Jawale**, MS Completed: 2022.
  Thesis: Succinct Non-interactive Arguments for Bounded Depth Computations.
- ◇ **Andrew Liu**, MS Completed: 2022.
  Thesis: Secure and Scalable Robust Federated Learning.
- ◇ **Amit Agarwal**, MS Completed: 2021.
  Thesis: Two-Round Maliciously Secure Computation with Superpolynomial Simulation.

Undergrad
- ◇ **Alexandra Levinshtyn,** 2023 - Present.
- ◇ **Devin Akman**, Graduated: 2020.
  Thesis: New Techniques in Non-malleable Secret Sharing for General Structures.
  Now PhD student at the Washington University of St. Louis.
- ◇ **Kabir Tomer**, Summer intern, 2020.
  Now PhD student at the University of Illinois, Urbana-Champaign.
- ◇ **Olivia Figueira**, Summer Distributed REU (DREU) intern, 2020.
  Now PhD student at the University of California, Irvine.

Teaching

- Fall 2023 ◇ UIUC. Introduction to Quantum Computing (Undergraduate) CS 498 QC.
- Spring 2023 ◇ UIUC. Topics in Cryptography (Graduate) CS 507.
  Listed among Teachers Ranked as Excellent by Their Students.
- Fall 2022 ◇ UIUC. Cryptography (Undergraduate) CS 407.
  Listed among Teachers Ranked as Excellent by Their Students.
- Spring 2022 ◇ UIUC. Quantum Cryptography (Graduate) CS 598CTO.
- Fall 2021 ◇ UIUC. Algorithms and Models of Computation (Undergraduate) CS 374.
- Spring 2021 ◇ UIUC. Special Topics in Cryptography (Graduate) CS 598 DK.
  Listed among Teachers Ranked as Excellent by Their Students.
- Fall 2020 ◇ UIUC. Applied Cryptography (Undergraduate) CS/ECE 498 AC (407).
- Fall 2019 ◇ UIUC. Special Topics in Cryptography (Graduate) CS 598 DK.
  Listed among Teachers Ranked as Excellent by Their Students.

Outreach

- Mentorship ◇ NSF CSGrad4US mentor, guiding returning students through the application process towards a successful CS PhD admission and school selection, 2025.
- ◇ CS STARS (Student Ambassadors/Research Scholars) mentor to undergraduate researchers, 2023-Present.
- ◇ Panelist at the CrossFyre workshop for cryptography researchers in 2024.
- ◇ Mentor and panelist at the Rising Stars in EECS Workshop at UIUC in 2019.
- Misc. Efforts ◇ Member of the Broadening Participation in Computing Committee at the UIUC CS Department, 2021-22 (Policy subcommittee), 2022-23 (Engagement subcommittee), 2024-25 (Creating safe spaces subcommittee).
- ◇ SafeToC Volunteer, ensuring a safe environment in CS theory conferences including ACM STOC, IEEE FOCS and ITCS; 2020-Present.
- Media ◇ YouTube episode detailing journey into academia and advice for young researchers released in 2022 (organized by IIT Delhi).
- ◇ Discussed quantum information and cryptography for middle school audiences in an interview with popular children's magazine, *Muse*; 2023.
- ◇ Recorded a podcast episode with *Entangled Things* explaining quantum cryptography to general audiences; 2023.

Service

- Workshops ◇ Co-Chair of the FOCS Workshop Committee, 2025-26.
- ◇ Organizer of the Midwest Crypto Day, 2023.

Service (continued)

- Co-organizer of the STOC'22 workshop: The Multiple Facets of Quantum Proofs
- PC co-chair of the Asiacrypt'22 Satellite workshop on Quantum Cryptography

Area Chair
- Annual International Cryptology Conference (EUROCRYPT) 2026
- Annual International Cryptology Conference (CRYPTO) 2025

PC Member
- ACM Symposium on the Foundations of Computer Science (FOCS) 2026
- Innovations in Theoretical Computer Science (ITCS) 2026
- ACM Symposium on the Theory of Computing (STOC) 2025
- ACM Symposium on the Theory of Computing (STOC) 2024
- Annual International Cryptology Conference (CRYPTO) 2024
- Theory of Cryptography Conference (TCC) 2024
- QCrypt Conference (QCrypt) 2024
- Innovations in Theoretical Computer Science (ITCS) 2023
- ACM Symposium on the Theory of Computing (STOC) 2022
- Theory of Cryptography Conference (TCC) 2022
- ACM Symposium on the Theory of Computing (STOC) 2020
- Theory of Cryptography Conference (TCC) 2020
- Innovations in Theoretical Computer Science (ITCS) 2020
- International Conference on Cryptology in India (INDOCRYPT) 2020
- IACR Conference on Theory and Applications of Cryptology (EUROCRYPT) 2019

UIUC Engg
- IQUIST (Illinois Quantum Information Science & Technology) Center.
  - Science Advisory Board (SAB) Member, 2021-Present
  - Postdoctoral Scholars Program Committee Member, 2022-Present

UIUC CS
- Tenure-Track Recruiting Committee Member, 2020-21, 2021-22
- Graduate Study Committee Member, 2019-20, 2020-21, 2022-23
